Simple Pmd MMH or NTO	Tabs	Girth	Vane, Trap & Sponge

The tank assembly is a hemispherical pressure vessel of all welded construction. It is mounted by 32 circumferential tabs with nut plates located on one of the hemispheres near the girth weld joint. The tank contains an internally-mounted propellant management device (PMD), with perforated sheet & woven screen, fabricated to maintain separation of liquid propellant expulsion from the tank under low or zero gravity conditions.
